<td>American Brett</td>
<td>American Pale Ale</td>
<td>American Black Ale</td>
<td>Irish-Style Dry Stout</td>
<td>Belgian-Style Tripel</td>
</tr>
</tbody>
</table>

## INTERACTIONS

- Complementary grain flavors balance hops while remaining light on the palate.
- Food adds richness to the beer while balancing salt and acidity.
- Beer brings out salinity and natural sweetness while cleansing the palate.
- Combining these flavors brings ou umami and adds earthy notes that rest on the center of the palate.
- Complements roastiness (Maillard reaction) while fat coats to neutralize hop bitterness.
- Beer cuts through, balances strong flavors and allows for a complex finish.
- Brings out umami and balances sweetness and richness.
- Beer complements the natural flavors and textures while cutting though fat, cleansing the palate.
- Highlights the roasted character (Maillard reaction).
- The intensity of the pork fat stands up to the strong beer characteristics.
- Balances richness on the palate so the dessert doesn't finish cloyingly.
